

FIELD NOTES

Adobe Creek
Sonoma Creek

Barrier - This barrier to Steelhead in the form of a 4' spillway under the county bridge located on the old Adobe Road, 4 mi. es southeast of Petaluma was investigated at the request of Warden Laws. Less than 1/4 C.F.S. water was running at bridge at time of visit. Residents of area claim creek dry from mouth upstream two miles above subject bridge barrier, where a 6' water diversion dam exists. This diversion is for the Petaluma City water supply. Recommend no action taken to remedy barriers.
